

Money Saver

Technologies to use:

Sequelize, MYSQL, Javascript, Node, JQuery, JQuery UI, Express, AMCharts, React

Overview

Money Saver is an expense tracker for dining out.

This app is valuable because so much money can be saved if everyone knew how much they were spending and this is a great way to show them that.

Goals

1. Help people watch what they spend if going out.
2. An app that will help people make better decisions regarding their expenses.
